Interceptors

# Using \$resource

# Using \$http

# Using Restangular

# Quiz

You should never use a \$resource to access a non-RESTful service. True or False?

False

Which source of promises has a different API. \$http, \$request, or \$q?

\$http

Every type of Angular promise has a then function. True or False?

True

# Quiz

Caching will only work if the url of the request is the same.  
True or False?

True

Can you set custom headers for one specific request?

Yes

When you set a header globally, it can be customized by HTTP verb. True or False?

True

# Quiz

If you had some oddly shaped data on the server and you needed to change it before it went through binding, would you use an interceptor or a transform?

**Transform**

If you wanted to add additional data to every request, would you use a transform or an interceptor?

**Interceptor**

What does one of the built in angular transforms do?

**JSON serialization & deserialization**

# **Module Conclusion**
